

# The Zero-Cost Animation Playbook

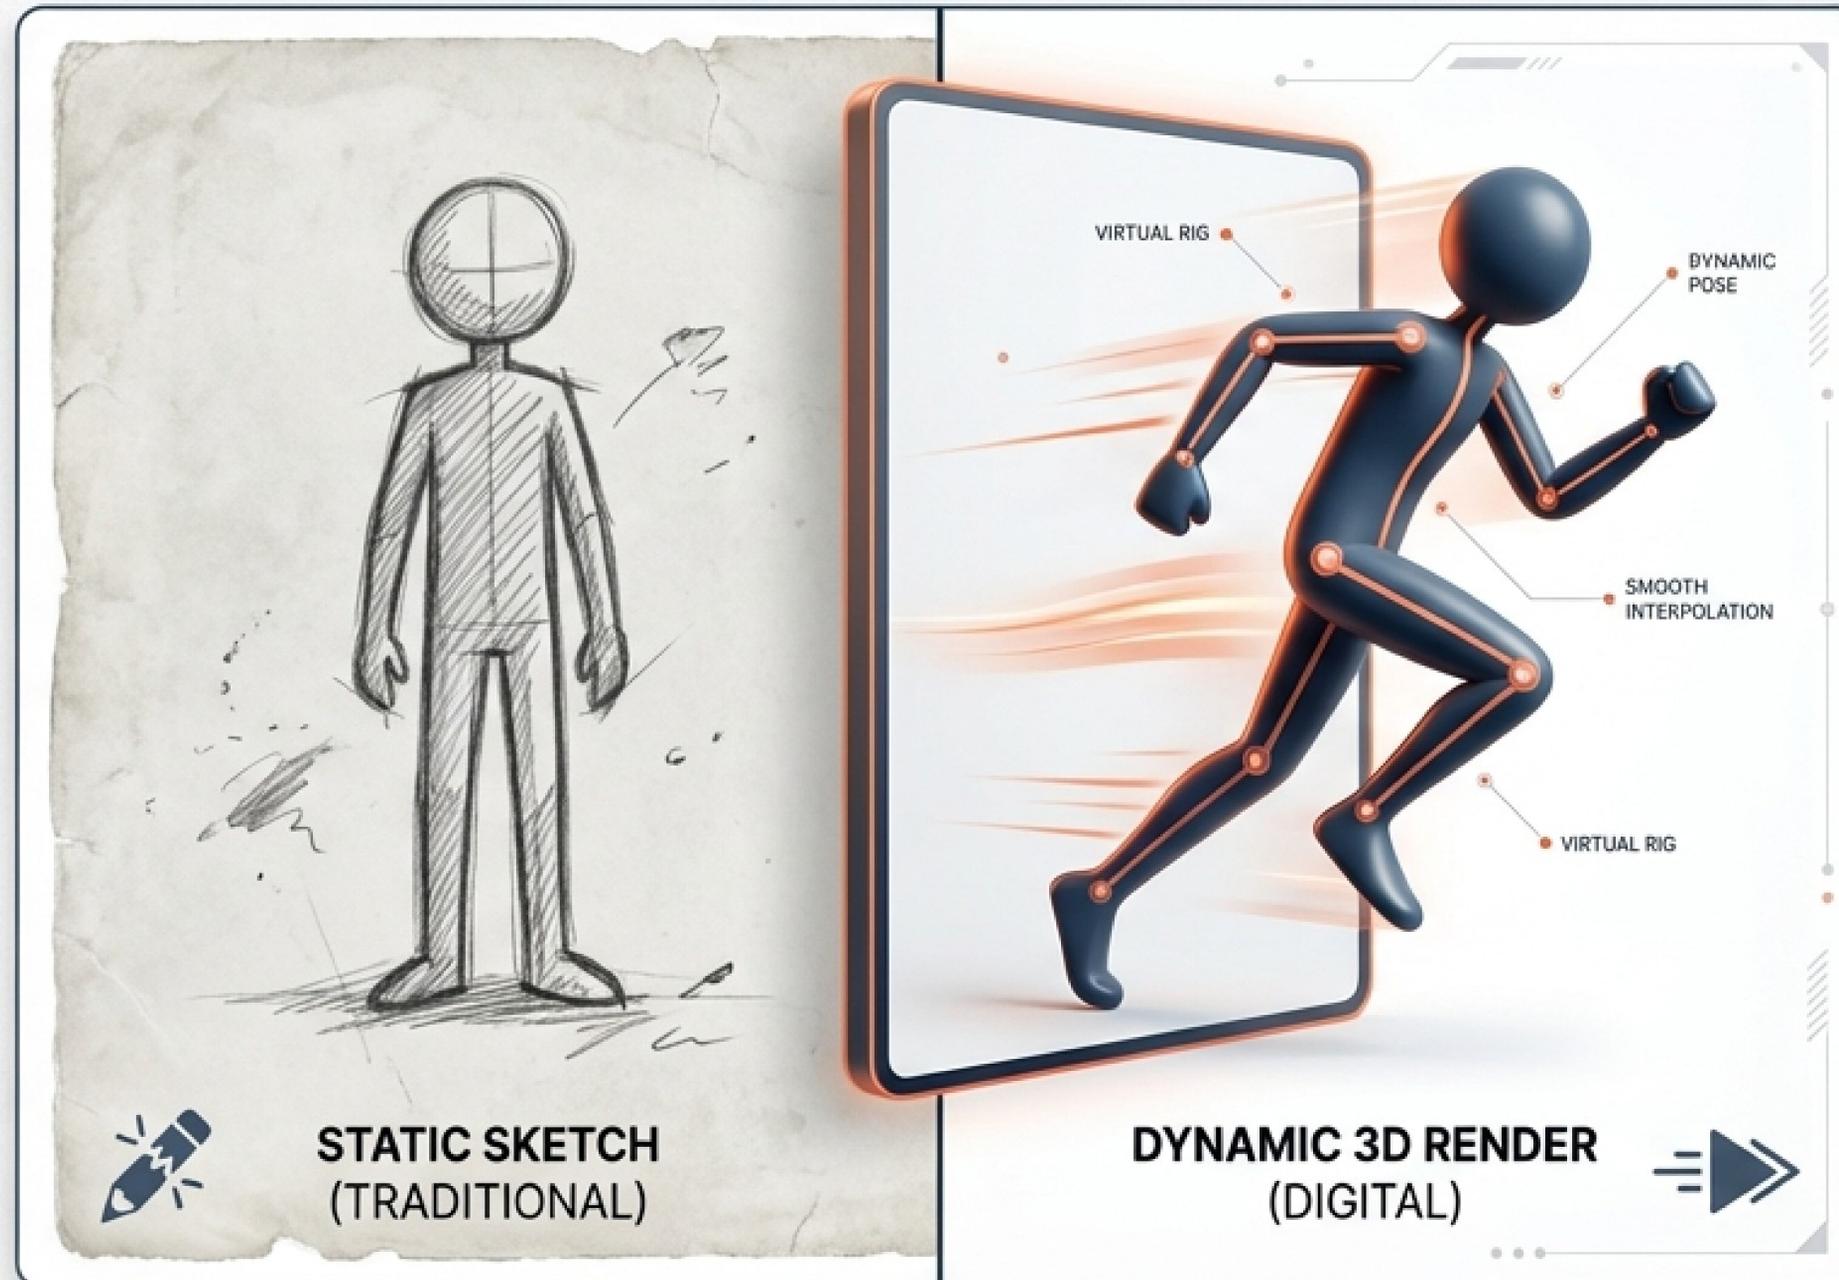

## THE CHALLENGE

Traditional animation is labor-intensive, requires specialized skills, and is costly to produce, often resulting in static, low-fidelity outputs.

## THE SOLUTION

Leverage free, accessible digital tools and automated processes to generate high-quality, dynamic 3D animation with zero financial investment.

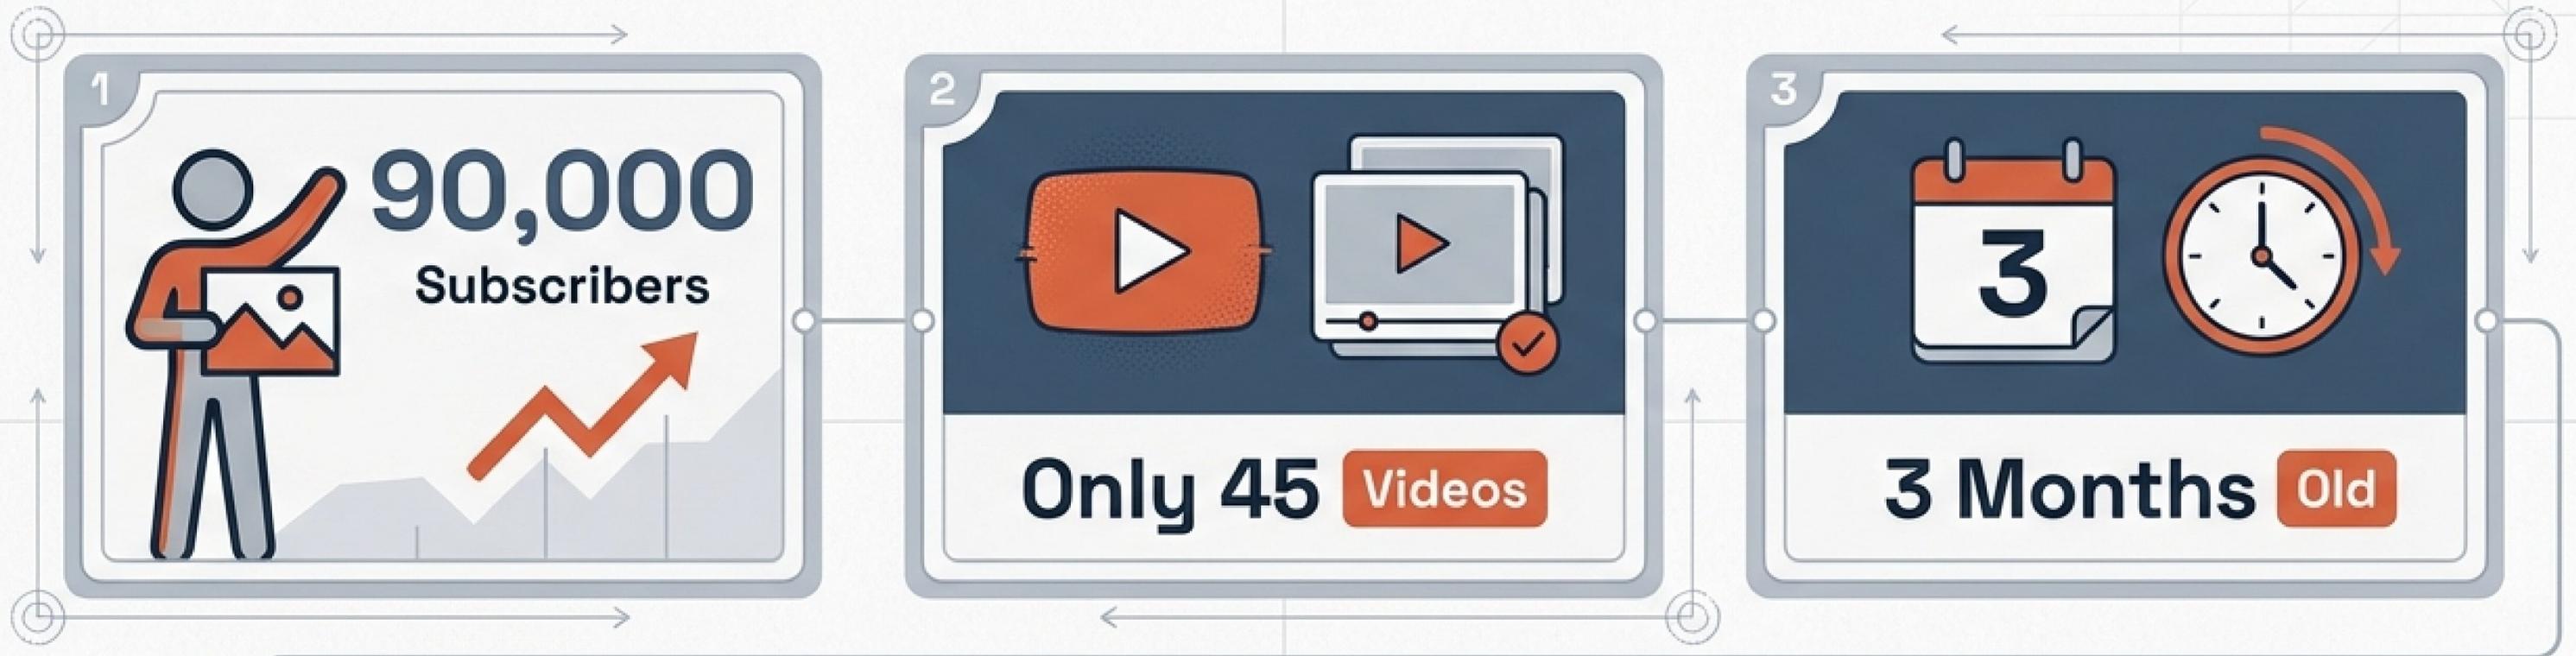

## KEY BENEFITS

- Instant Pose Generation
- Free Animation Libraries
- No Coding Required
- Rapid Iteration
- High-Fidelity Output 

## WORKFLOW STEPS

1. IMPORT MODEL (FREE ASSETS)
2. APPLY AUTO-RIGGING (AI-POWERED)
3. GENERATE MOTION (PRESET & CUSTOM)

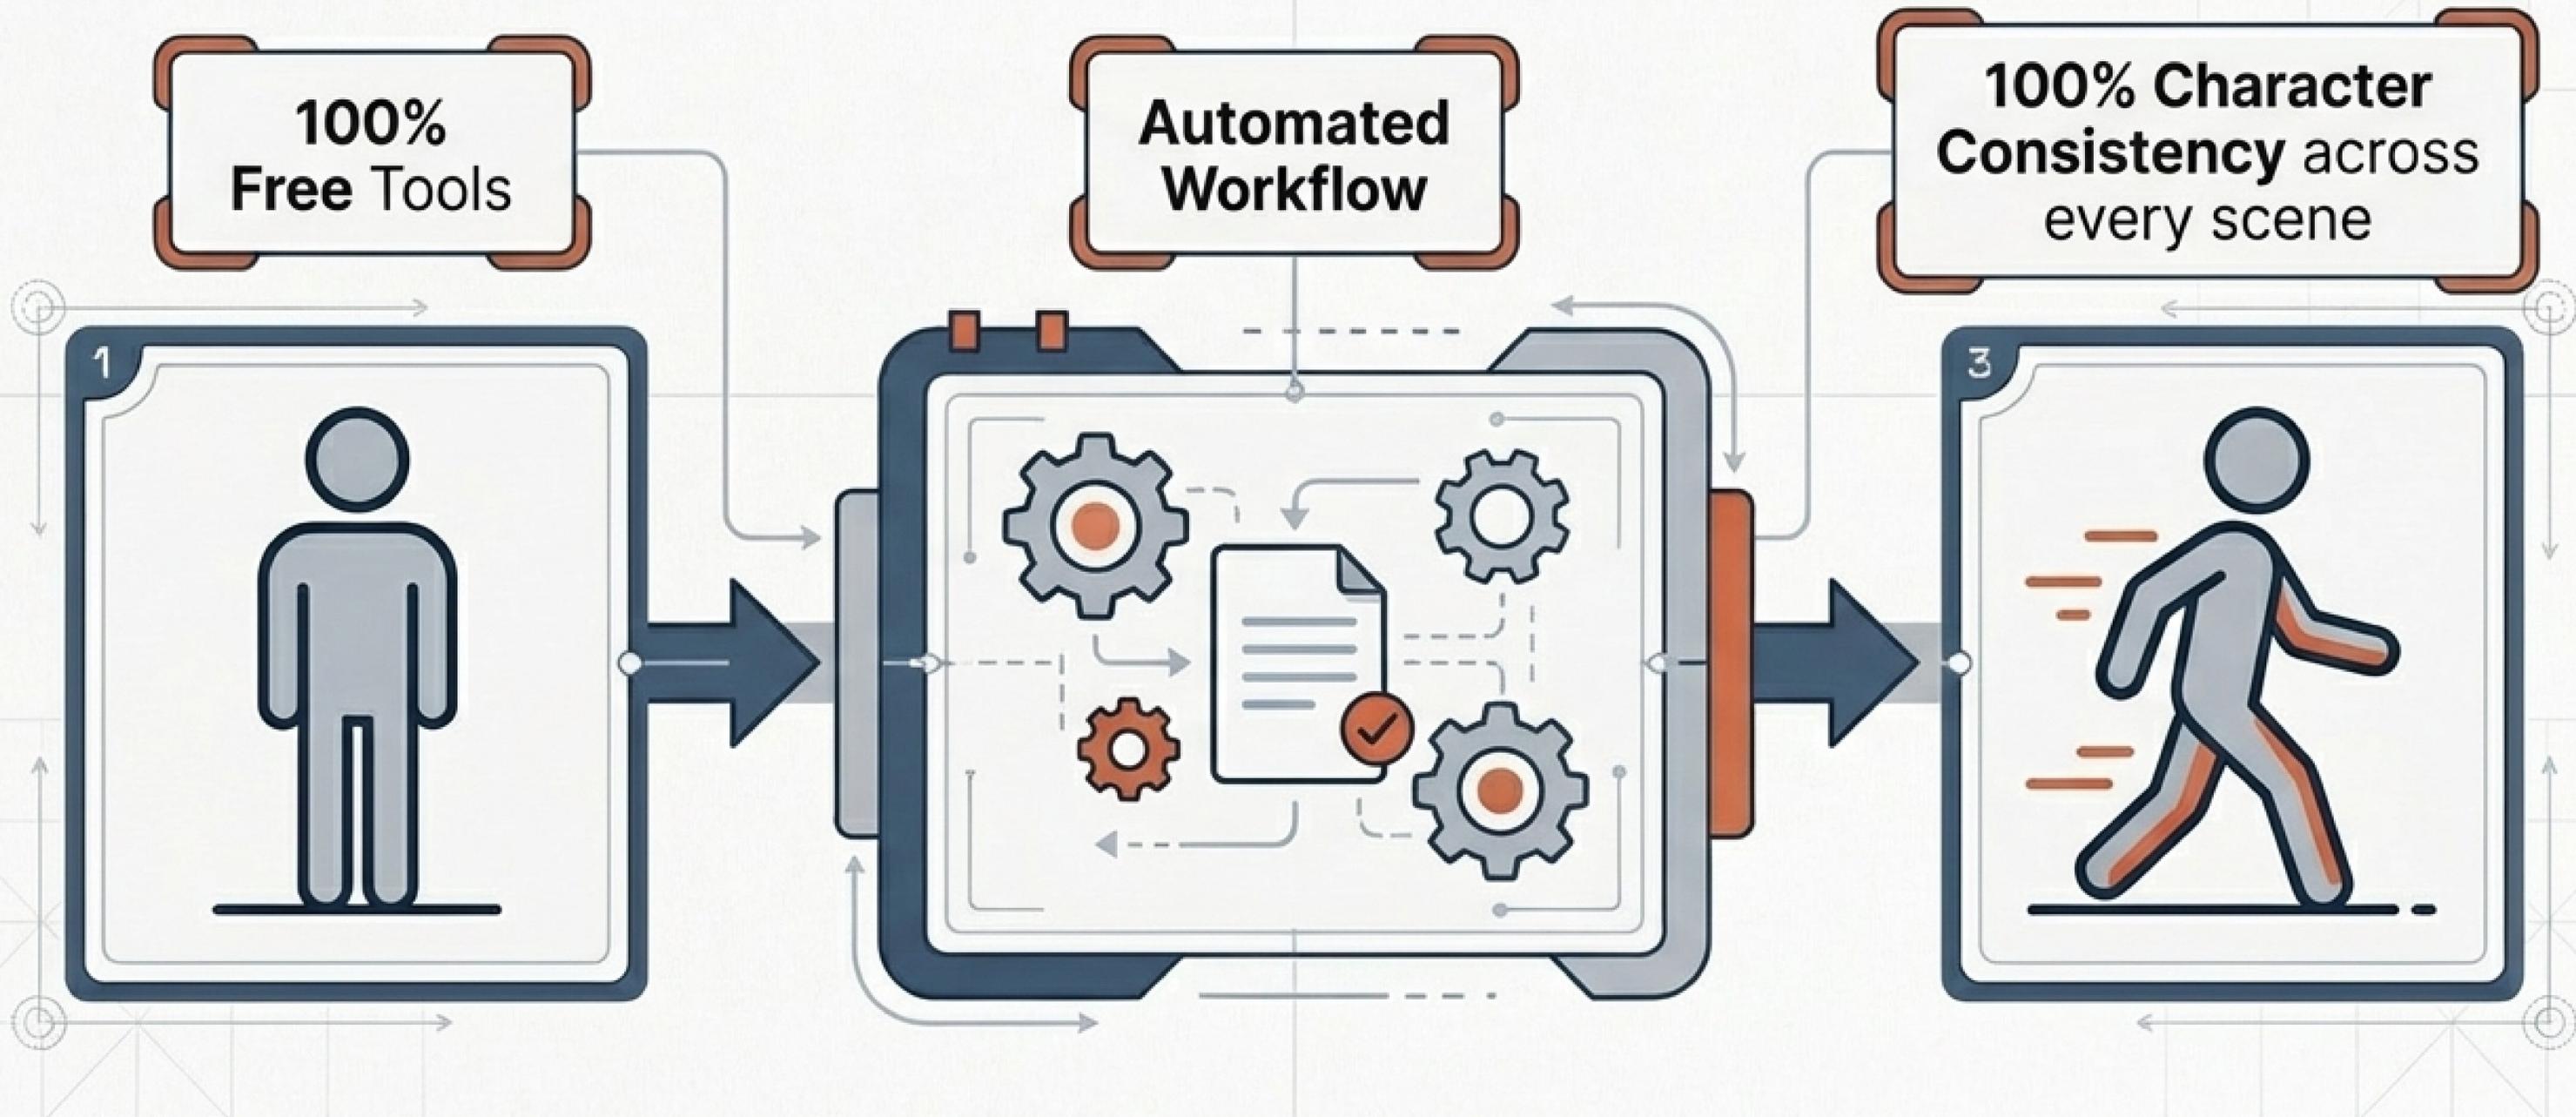

# 90,000 subscribers in 3 months using only static images

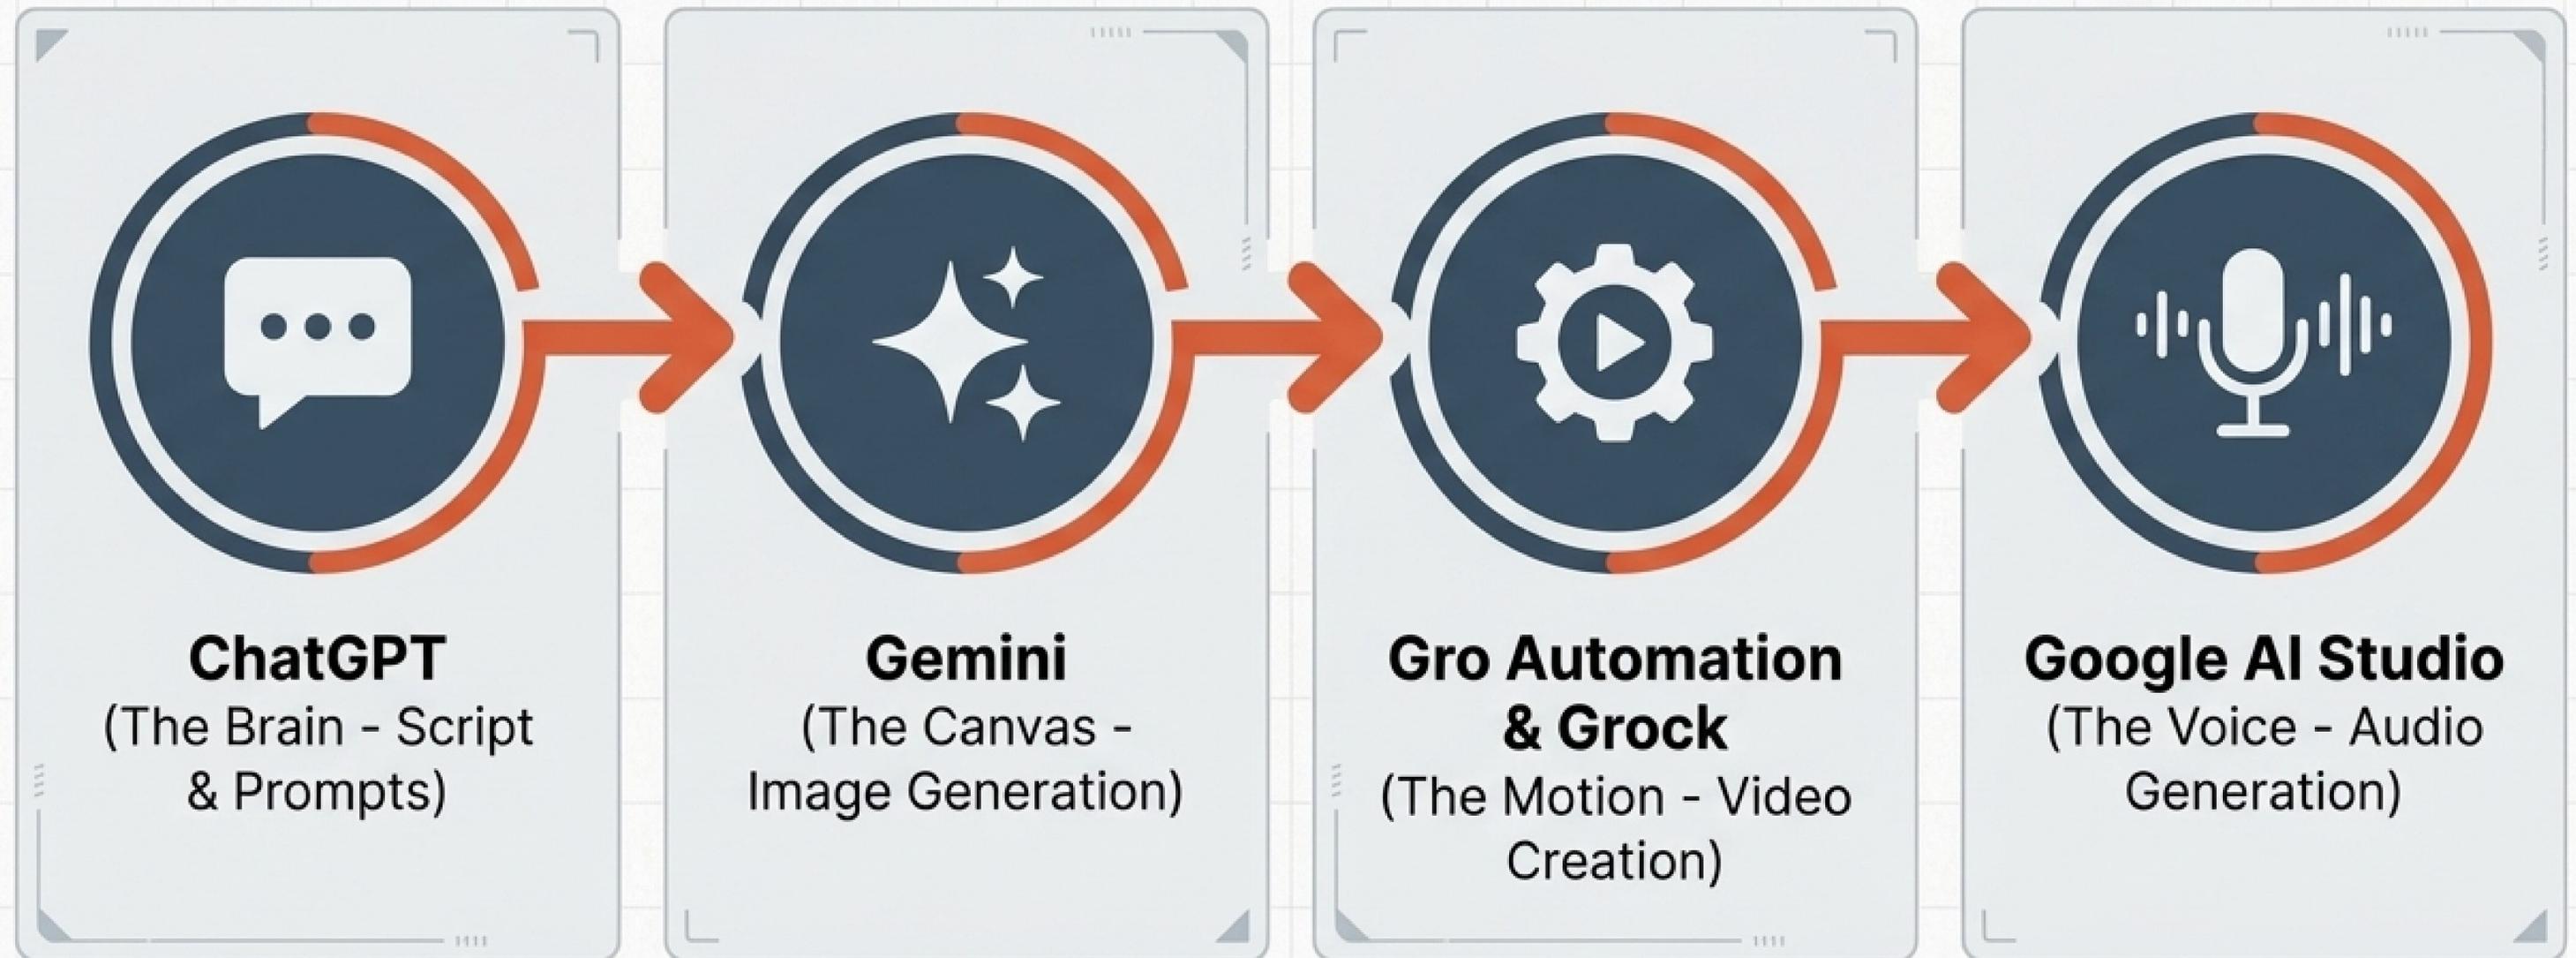

A highly successful YouTube channel recently exploded in growth and monetization. **Their secret?** They don't even animate their stickman characters. They simply use **static images**.

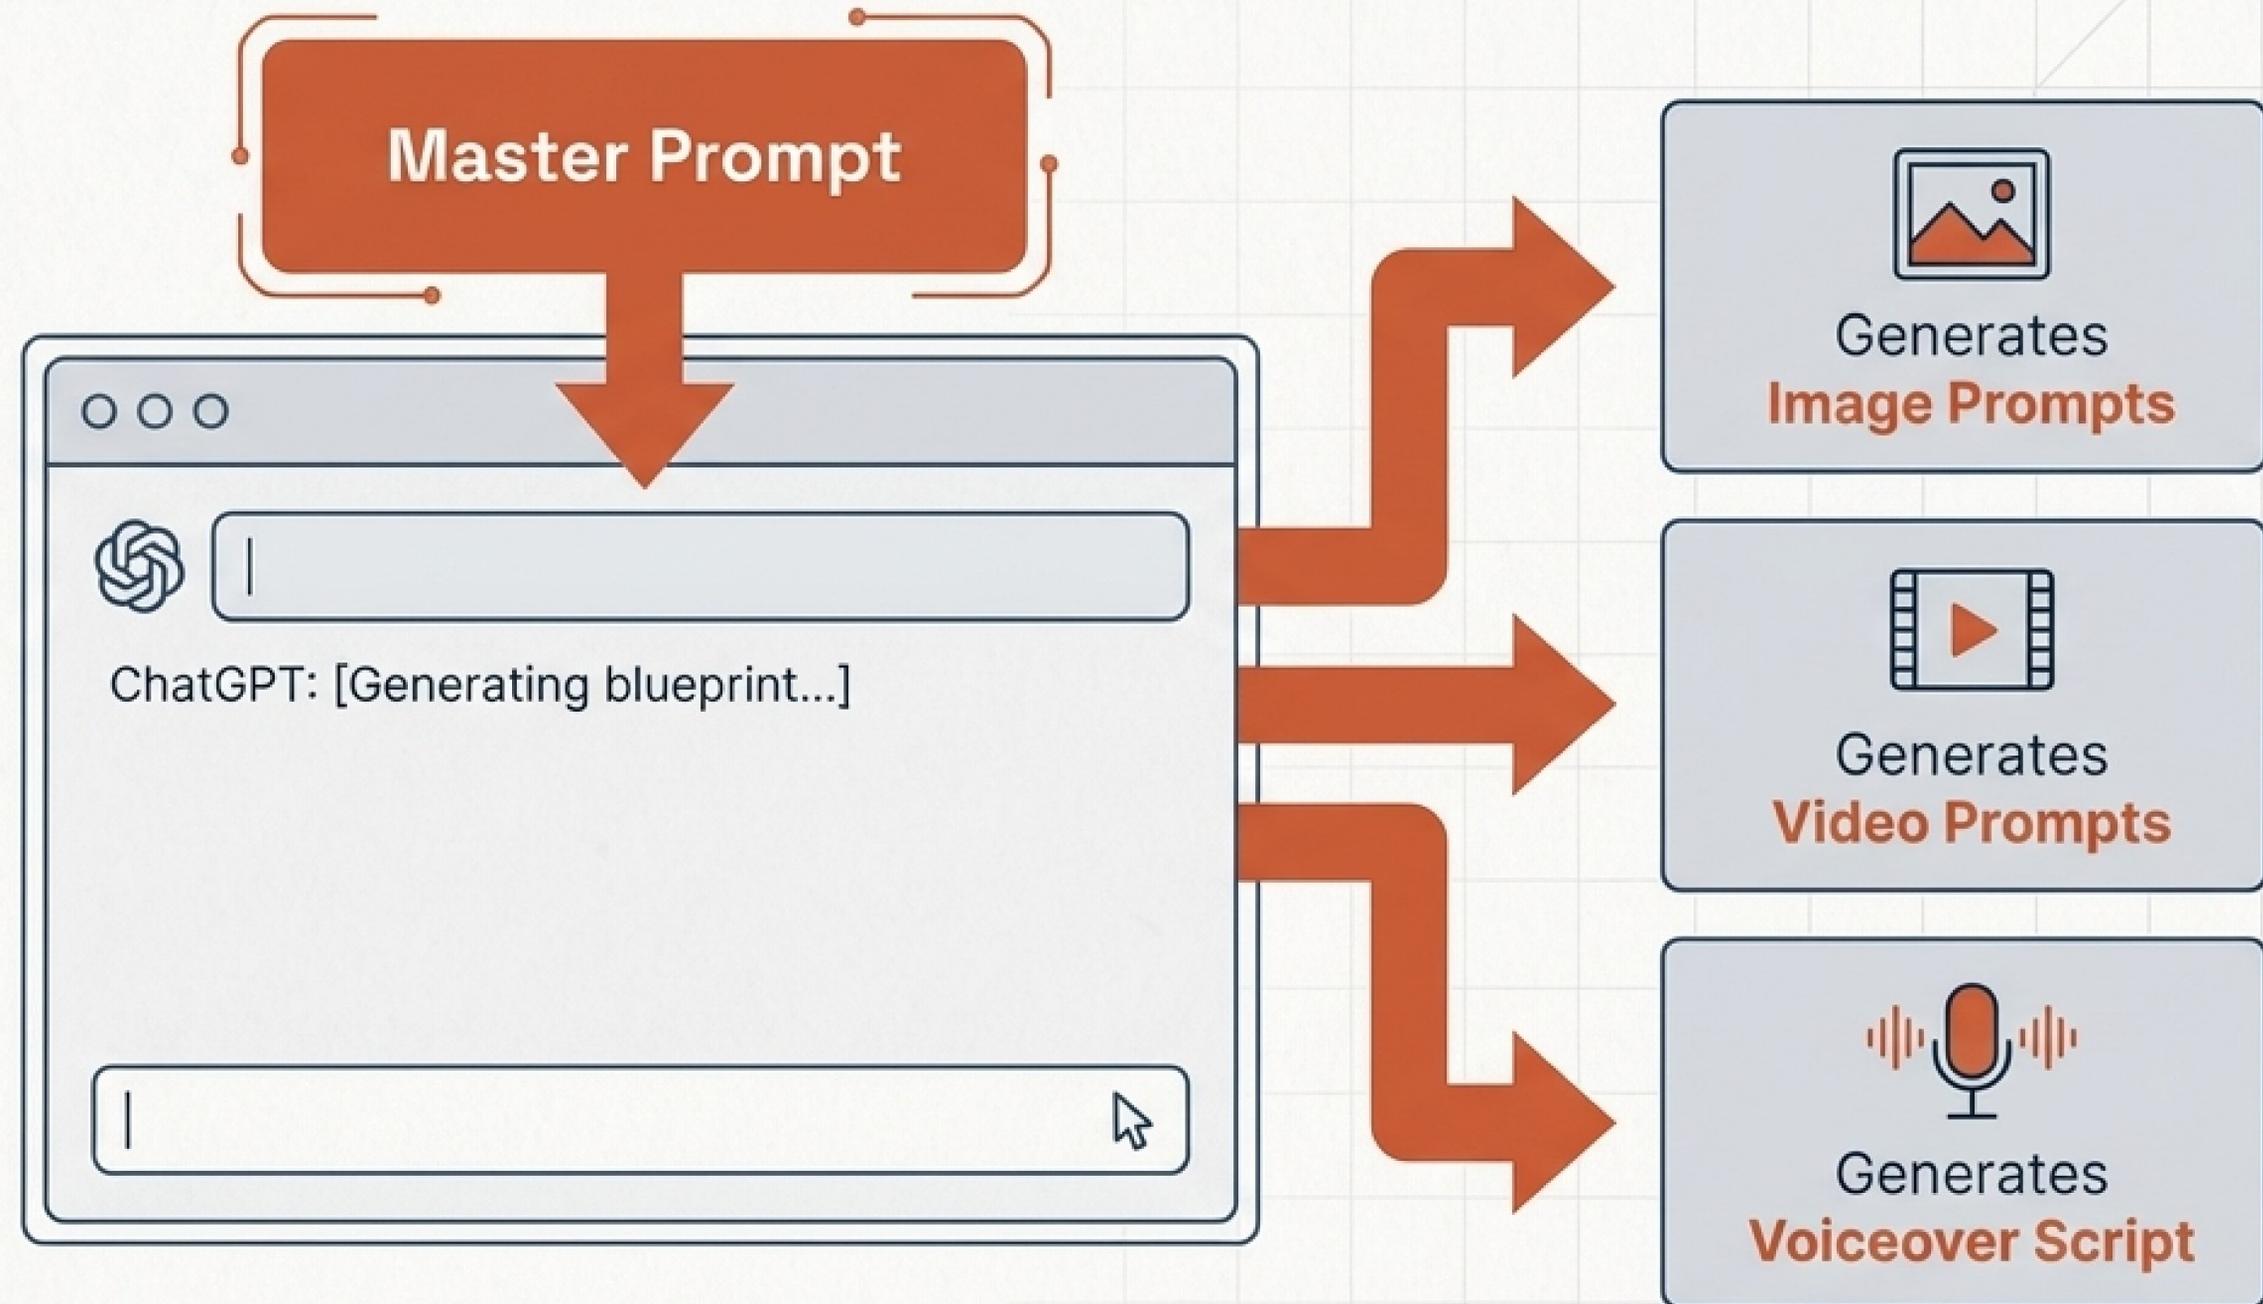

# You can beat their strategy by automating full animation for free

# The complete zero-cost AI production stack

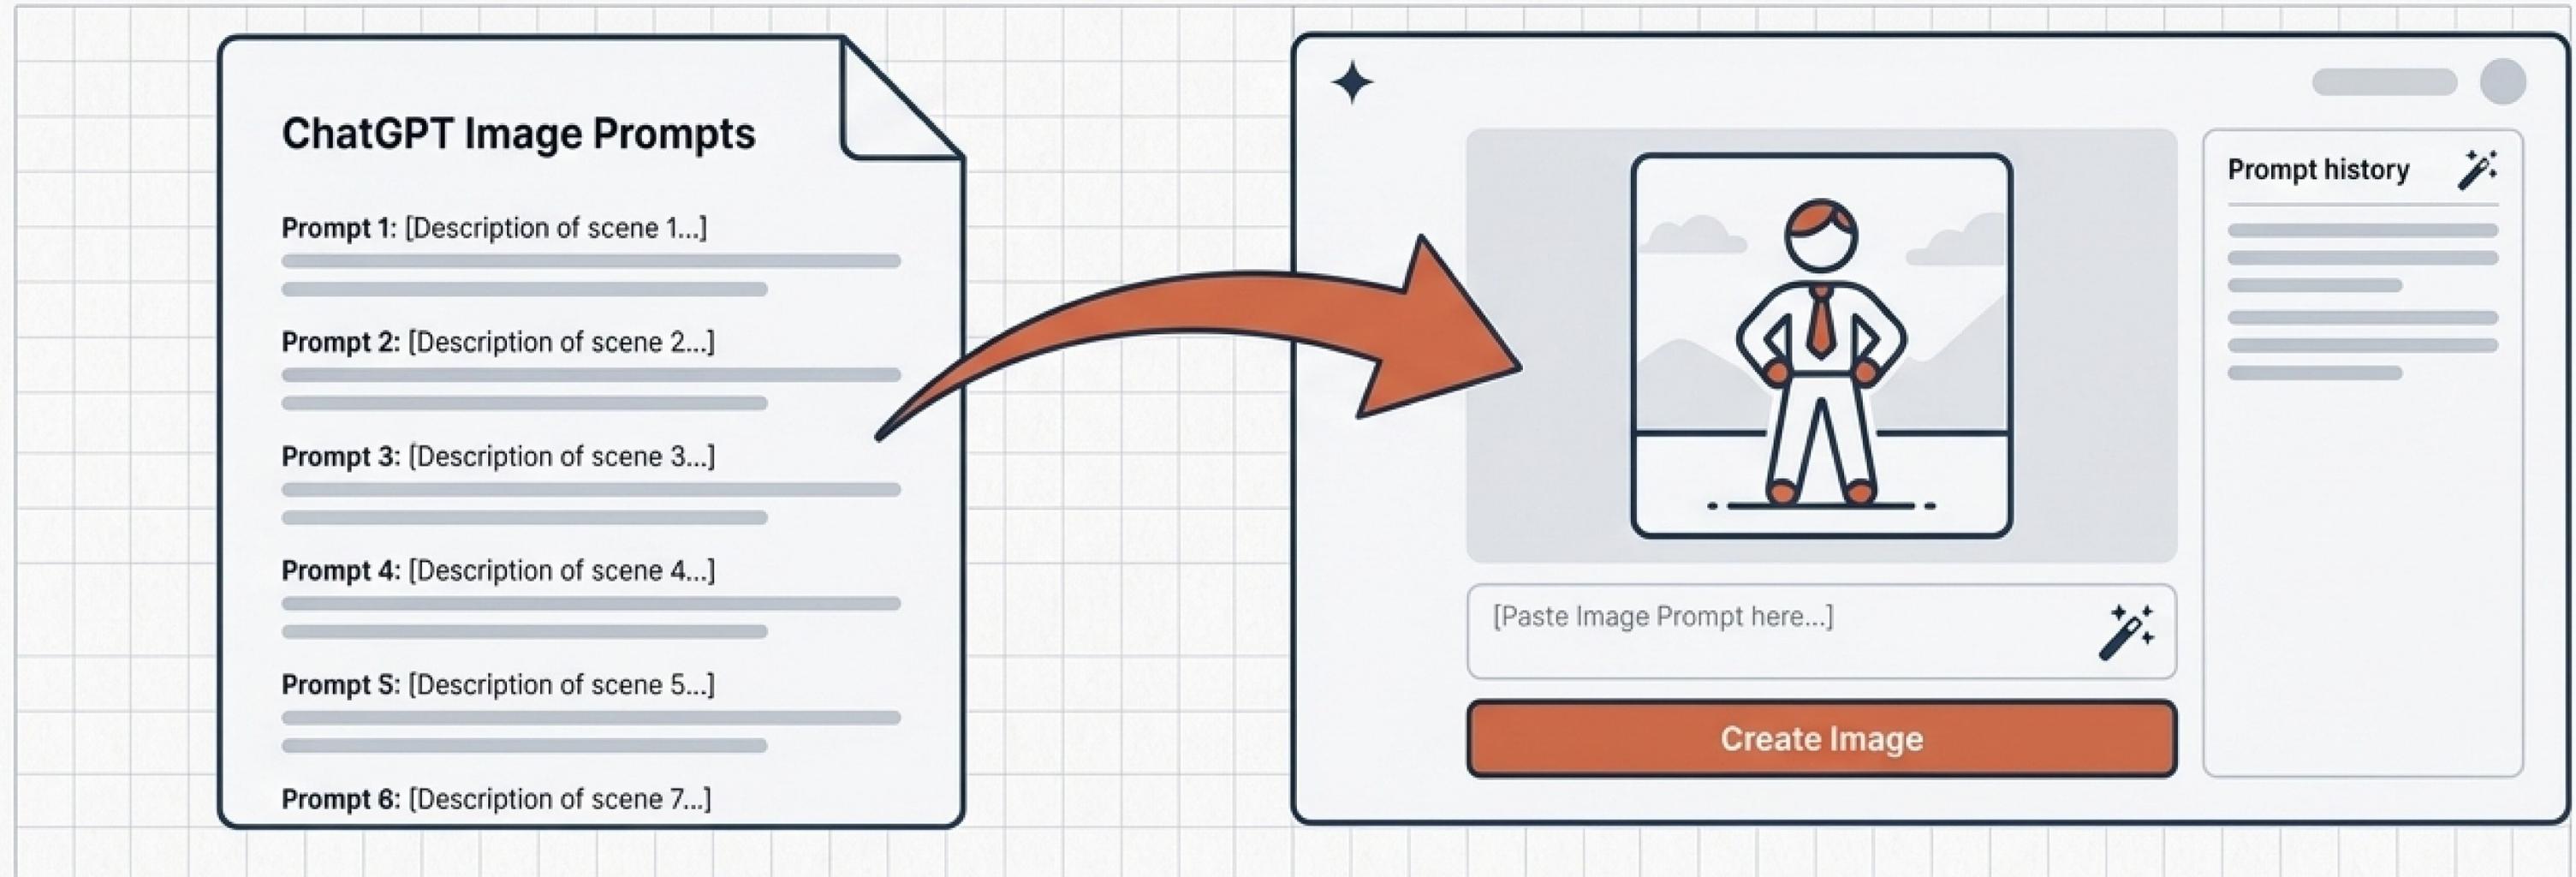

# Phase 1: Generate the entire video blueprint in ChatGPT

**Step 1:** Paste the 'Master Prompt' and insert your topic.

**Step 2:** Click Generate.

# Phase 2: Create consistent scenes using Gemini

**1** **Step 1:** Open Gemini and select the 'Create Image' option.

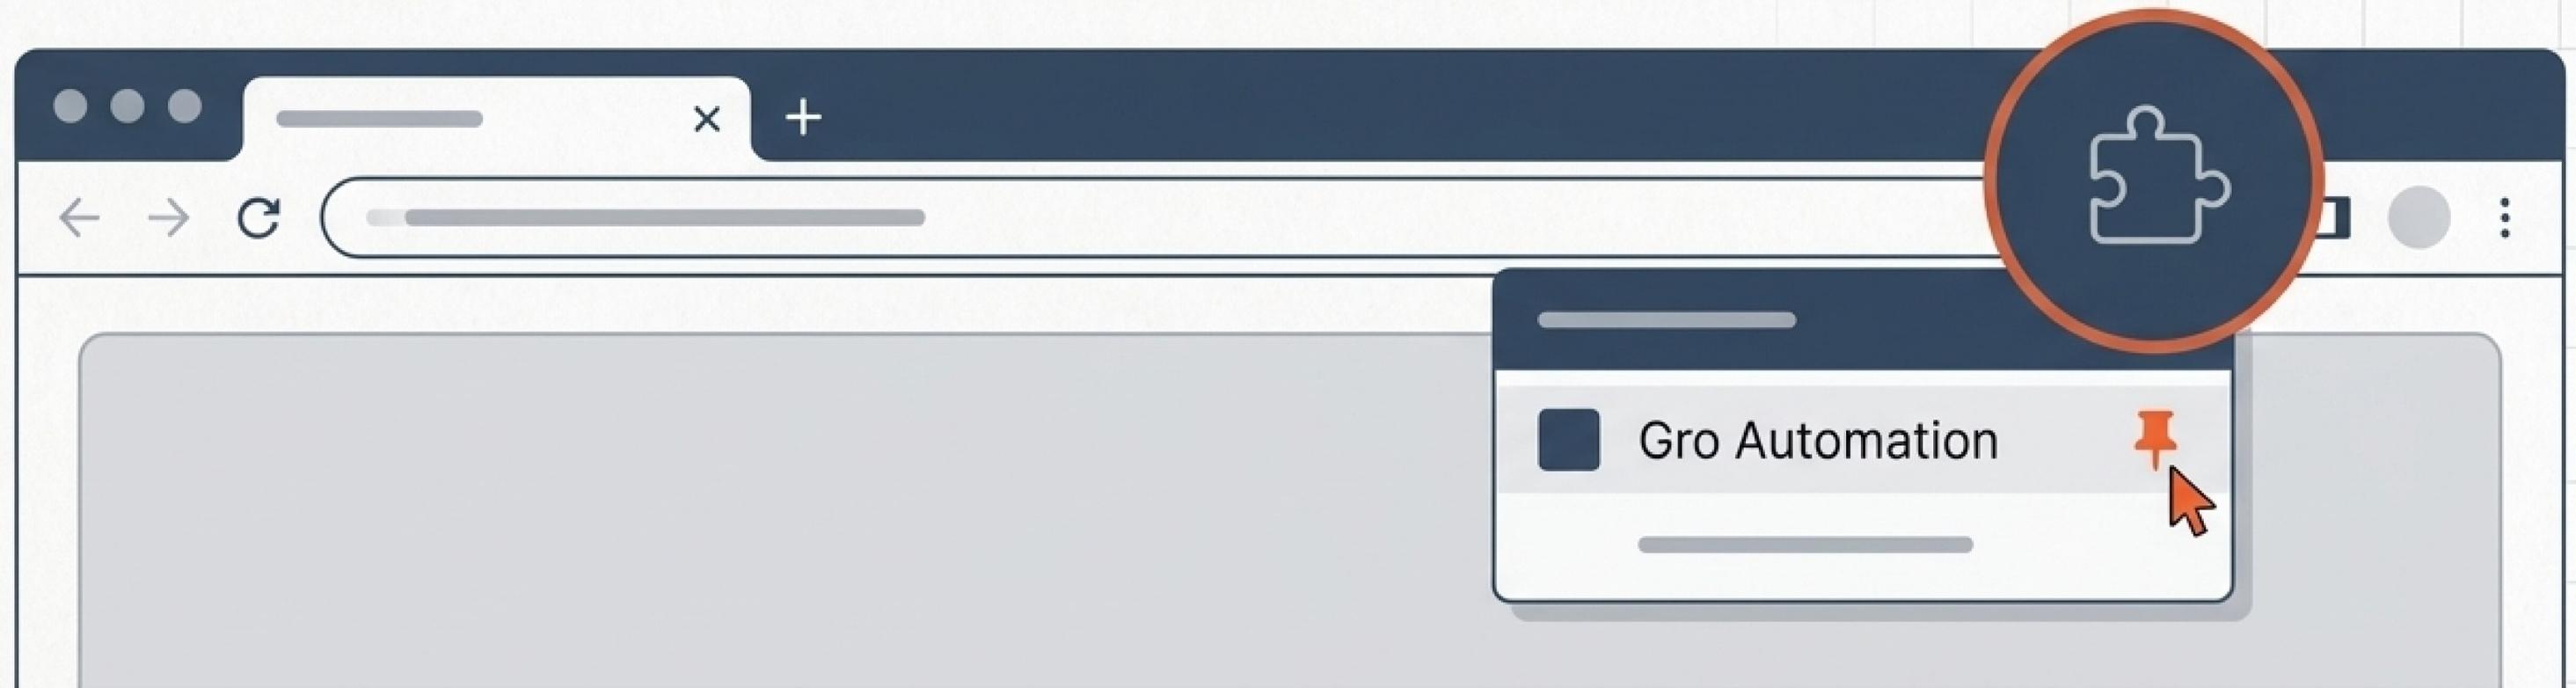

**2** **Step 2:** Paste the image prompts from ChatGPT scene by scene.

**3** **Step 3:** Download all the static photos to your computer.

# Phase 3: Set up your automated video engine

- Step 1:** Search for and install the “Gro Automation” extension from the web store.
- Step 2:** Pin the extension for easy access.
- Step 3:** Open the Grock website and log in.

**Pro-Tip:** Click “Navigate to Grock” inside the extension. The extension will only become active when the Grock website is open in your browser.

# Phase 3: Feed the prompts and let the engine run

### Frame to Video

- ✘ Premaring your short andis paced ones wooth scene.
- ✘ Brantting your steps; wentiraymen in stacikman.
- ✘ Enwerdinging your aware in eoting oowards of cotrae:s metatos.
- ✘ Evecoving your video prompt move back tnapped and dlscoving.
- ✘ Premating to to be causes and quality brascurant.
- ✘ Reserching to using your svenr-assion hétper and the drawan.
- ✘ Something to make your miment between your user 'ang'finess and making.
- ✘ Essimbting hew great and-nses of pisces on rire wag.
- ✘ Regarding your dearly sporks to aremerally as an event troon.
- ✘ Bmwoving the facer just compositive forward is to you.

Run

**Step 1:** Choose "Frame to Video" and upload your downloaded photos in the exact correct order.

**Step 2:** Paste the video prompts from ChatGPT and click Run.

## Critical Warnings:

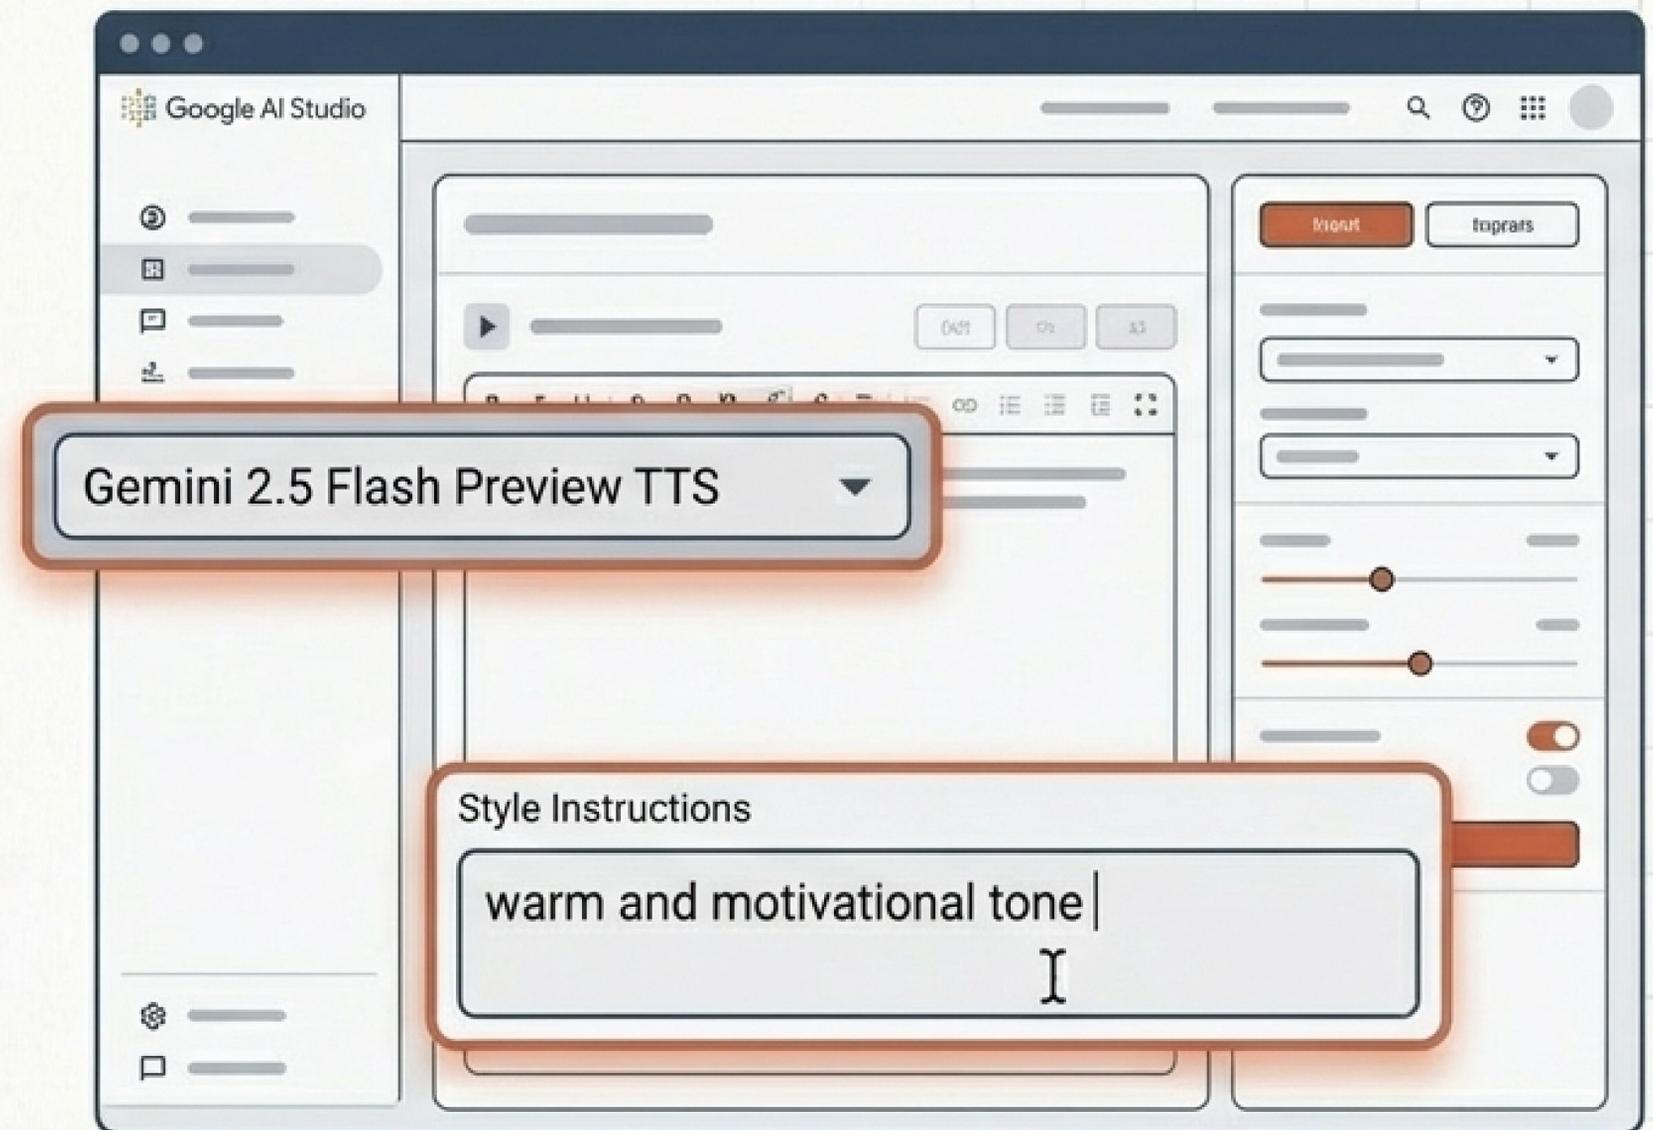

**Formatting:** Every two new lines creates a new prompt. prompt. If scenes look wrong, check your line breaks.

**DO NOT CLOSE THE TAB:** The extension processes videos one by one. Closing the Grock tab will break the automation.

# Phase 4: Generate a high-quality voiceover in Google AI Studio

- ✔ **Step 1:** Select the Single Speaker option.
- ✔ **Step 2:** Choose the Gemini 2.5 Flash Preview TTS model.
- ✔ **Step 3:** Paste the combined voiceover script from ChatGPT.
- ✔ **Step 4:** Add 'warm and motivational tone' to the Style Instructions and run.

# Phase 5: Sync the automated assets in your editor

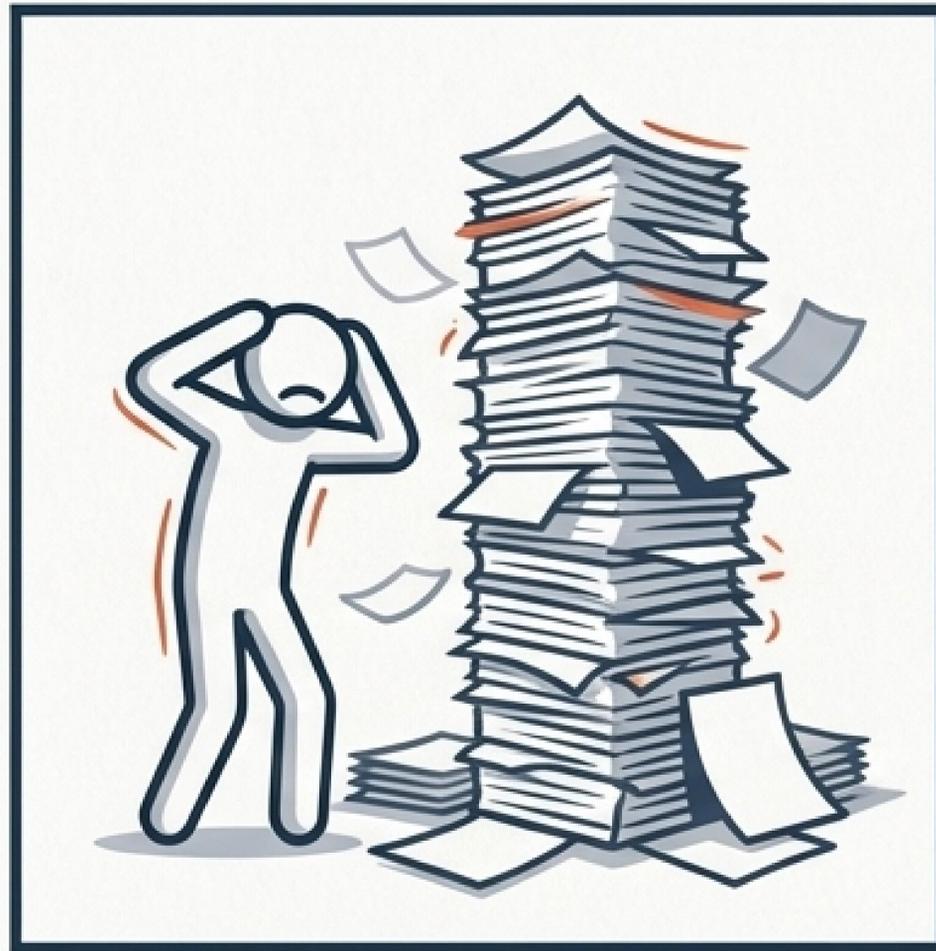

✓ - Drag the auto-downloaded video folder from Gro Automation into your editor.

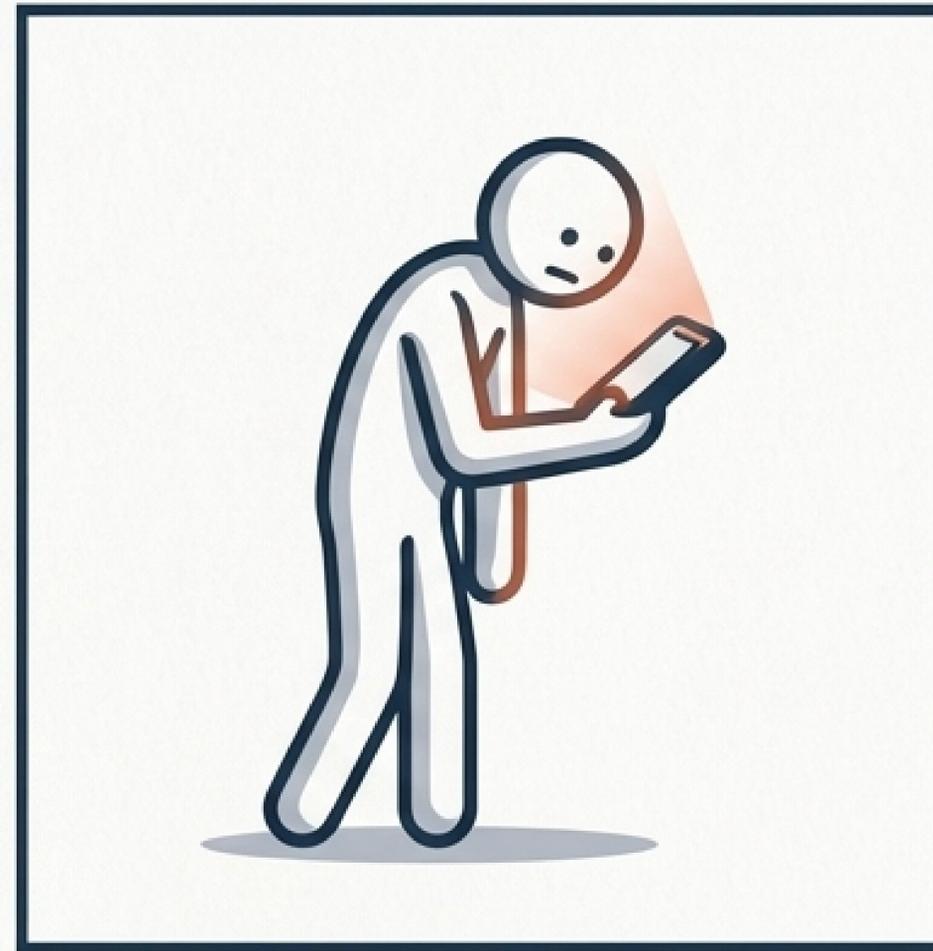

✓ - Drop the audio file from Google AI Studio underneath.

✓ - Match the audio timing to the video transitions for a seamless final result.

# The Output: The 5-Minute Rule (Part 1)

Ever feel too overwhelmed to even start? The work feels heavy before you even open your laptop.

So instead you scroll, telling yourself you'll start later.

The problem isn't laziness. It's that the task feels too big.

# The Output: The 5-Minute Rule (Part 2)

Here's a simple trick: the 5-minute rule. Set a timer and promise you'll stop after that.

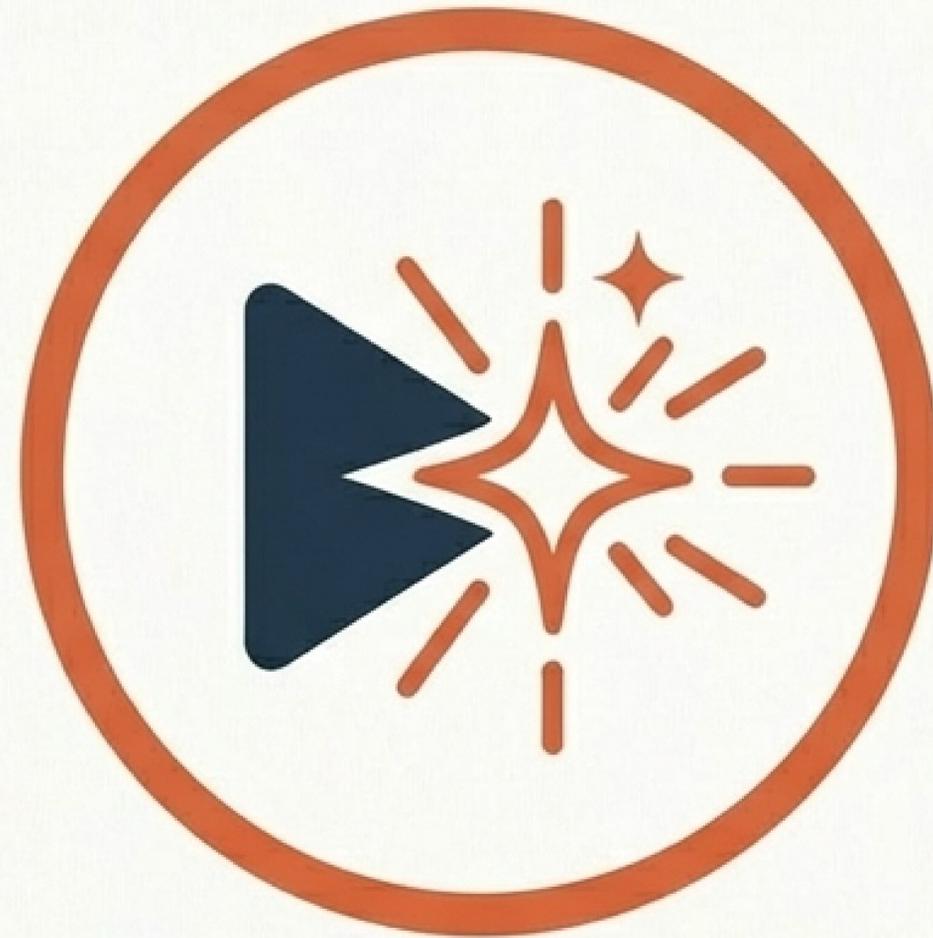

Once you start, the pressure disappears. Progress feels good. Momentum builds.

Motivation doesn't come before action. Just start for 5 minutes.

# Your automated animation studio is ready

- 100% Free workflow.
- Complete character consistency.
- Highly scalable production.

Grab the master prompt from the video description, open ChatGPT, and generate your first script today.
